PROFILE

Results-driven Senior Software Engineer with almost 3 years of expertise in developing scalable APIs and dynamic front-end applications using modern technologies like Node is, React, TypeScript, and JavaScript. Recognized for exceptional contributions with multiple team and individual awards, including the Top Talent Award. Proven ability to deliver impactful solutions, foster innovation, and excel in dynamic, collaborative environments. Skilled in problemsolving and creating user-focused applications.

SKILLS & INTERESTS

Core

: JavaScript, TypeScript, Java, React.js, Node.js, Express.js, MongoDB, REST APIs, LDAP, ISIM

Development

Tools &

: AWS (Lambda, DynamoDB, API Gateway, CloudWatch), Git/GitLab, Postman, PuTTY, WinSCP

Platforms

Collaboration &

: Agile Development, Jira, Debugging, Unit Testing Methodologies

WORK EXPERIENCE

Persistent Systems

Kolkata, West Bengal

Senior Software Engineer

Jun 2024 - Present

Project: IBM Product Engineering

Client: IBM

Developed advanced features and modernized user interfaces for IBM Security Identity Manager (ISIM), enhancing access control and identity governance.

- Designed and implemented the "Access Risk Control" feature, enabling real-time risk identification and mitigation, and streamlining security management processes.
- Built interactive dashboards using React and TypeScript, integrating APIs to provide actionable risk analytics and improve identity governance.
- Transitioned legacy UI workflows to a React-based architecture with IBM Carbon Design System, delivering responsive, accessible, and WCAG-compliant components.

Software Engineer Pune, Maharashtra

Project: Global Identity Access Management (GIAM)

Jun 2022 - May 2024

Client: Yum Brands, Inc. (KFC, Pizza Hut, Taco Bell)

The GIAM project streamlines identity and access management for Yum Brands across the US and international markets.

- Migrated legacy Java-based business logic to a serverless AWS architecture, improving scalability and reducing maintenance efforts.
- Developed APIs in Node is and TypeScript for user and restaurant management, onboarding, reporting, and dashboards, ensuring seamless global operations.
- Implemented AWS services like Lambda, API Gateway, and CloudWatch, delivering a secure and reliable infrastructure that boosted system uptime.
- Designed auditing functionalities using DynamoDB to enable comprehensive tracking and ensure compliance across all user activities.

PROJECTS

• Ecommerce API - Link

Developed a secure, scalable e-commerce API with JWT-based authentication, product CRUD operations, and order management. Integrated security features like Helmet and rate-limiting to ensure protection and efficient performance.

Jobs API - Link

Built a job management backend with JWT authentication, supporting job CRUD operations, filtering, sorting, and pagination. Ensured secure data handling and React frontend integration.

EDUCATION

University of Calcutta Kolkata, West Bengal

Bachelor of Technology in Computer Science and Engineering. CGPA - 8.2 Graduation Date: May 2022

University of Calcutta Kolkata, West Bengal

Bachelor of Science in Computer Science(Honours). Grade - First Class Graduation Date: Jun 2019

ACHIEVEMENTS

• Top Talent 2024 - Persistent Systems, 2024

- Bravo Individual Awards Persistent Systems, 2023
- Bravo Team Awards Persistent Systems, 2023
- Microsoft AZ-900 Certification
